DETAILED ACTION

Allowable Subject Matter

1. Claims 1-33 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Independent claims 1, 8, and 15 are directed to method, system, and computer product for generating a term structure of default probabilities by determining a firm's default barrier distribution from a plurality of risk factors comprising said firm's value and an unobservable default barrier comprising an incomplete information model.

The closest patent art of record is US Patent 6,078,903 to Kealhofer which teaches an invention directed to determining a firm's risk of default, but does not teach or suggest the inclusion of a default barrier distribution in the manner claimed by Applicant.

The closest non-patent literature is Default and Information by Kay Giesecke. The document is dated August 30, 2003, but was not published or made publicly available until 2006 in the Journal of Economic Dynamics and Control, 30(11), 2281-2303 as demonstrated by the web page <http://www.stanford.edu/dept/MSandE/people/faculty/giesecke/publications.html> (provided by Applicant). As such, it is not prior art. Kay Giesecke's article Default Compensator, Incomplete Information, and the Term Structure of Credit Spreads, Dec 12, 2001 is also closely related prior art. It, however, teaches the use of an Intensity Approach, in stead of the default barrier distribution approach taught by Applicant's present invention.

The art of record, either alone or in combination, fails to teach, suggest, or render Applicant's invention obvious.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Inquiry

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to BRIAN FERTIG whose telephone number is (571)270-5131. The examiner can normally be reached on Monday - Friday 8:30am to 5:00pm EST. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on (571) 272-6712. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

5. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
